DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 47-55 are, drawn to an induction heating system, classified in class 219, subclass 603+.
 - II. Claims 9-18, 39-46, and 56, drawn to a method of operating an induction heating system, classified in class 148, subclass 567+.
 - III. Claims 19-24 are, drawn to a method of shrink fitting components, classified in class 148, subclass 639+.
 - IV. Claims 25-27 are, drawn to a method of coating a portion of a workpiece, classified in class 427+.
 - V. Claims 28-33 are, drawn to a method of repairing a pipe by welding, classified in class 219, subclass 607+.
 - VI. Claims 34-38 are, drawn to a method of polishing a shaft, classified in class 451, subclass 6+.
2. The inventions are distinct, each from the other because:
3. Inventions II-VI and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the

apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such laser heating/welding/polishing. Or the apparatus as claimed can be used to practice another and materially different process such as cooking.

4. Inventions II-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and effects such as group II is for heat treatment, group III is for shrink fitting, group IV is for coating, group V is for welding, and group VI is for polishing.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups, restriction for

examination purposes as indicated is proper.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
